

Индивидуальный проект этап № 2

Установка DVWA

Павличенко Родион Андреевич

Российский университет дружбы народов

1 1. Информация

2 2. Выполнение лабораторной работы

Раздел 1

1. Информация

1.1 Докладчик

- **ФИО:** Павличенко Родион Андреевич
- **Статус:** Студент
- **Группа:** НПИбд-02-24
- **ВУЗ:** Российский университет дружбы народов
им. П. Лумумбы
- **Почта:** 1132246838@pfur.ru

Раздел 2

2. Выполнение лабораторной работы

2.1 Заходим на GitHub по ссылке и устанавливаем DVWA через командную строку

```
(rapavlichenko@rapavlichenko)-[~]  
$ sudo bash -c "$(curl --fail --show-error --silent --location https://raw.githubusercontent.com/IamCarron/DVWA-Script/main/Install-DVWA.sh)"  
[sudo] password for rapavlichenko:
```

DVWA
INSTALLER

```
Welcome to the DVWA setup!  
Script Name: Install-DVWA.sh  
Author: IamCarron  
Github Repo: https://github.com/IamCarron/DVWA-Script
```

2.2 Ввели SQL-user , пользователь root и пароль от моего аккаунта

```
Default credentials:  
Username: root  
  
Password: [No password just hit Enter]  
Enter SQL user: root  
Enter SQL password (press Enter for no password):  
SQL commands executed successfully.  
Configuring DVWA ...  
Configuring permissions ...  
Configuring PHP
```

2.3 Попробовали перейти по ссылке, убедились, что все работает

2.4 Нажали Create/Reset Database и заново ввели имя пользователя и пароль

```
allow_url_include = On
```

These are only required for the file inclusion labs so unless y

Create / Reset Database

2.5 Успешно зашли, установка завершена

Welcome to Damn Vulnerable Web Application!

Damn Vulnerable Web Application (DVWA) is a PHP/MySQL web application that is damn vulnerable. Its main goal is to be an aid for security professionals to test their skills and tools in a legal environment, help web developers better understand the processes of securing web applications and to aid both students & teachers to learn about web application security in a controlled class room environment.

The aim of DVWA is to **practice some of the most common web vulnerabilities**, with **various levels of difficulty**, with a simple straightforward interface.

General Instructions

It is up to the user how they approach DVWA. Either by working through every module at a fixed level, or selecting any module and working up to reach the highest level they can before moving onto the next one. There is not a fixed object to complete a module; however users should feel that they have successfully exploited the system as best as they possible could by using that particular vulnerability.

Please note, there are **both documented and undocumented vulnerabilities** with this software. This is intentional. You are encouraged to try and discover as many issues as possible.

There is a help button at the bottom of each page, which allows you to view hints & tips for that vulnerability. There are also additional links for further background reading, which relates to that security issue.

WARNING!
